TRIP REPORTS

Souvenir Peak—Revisited

by Bill Romberg

MCA members, Paul Kotelman, John Maltas, Kathy Still, Kirk Towner and I made a one-day ascent of both summits of Souvenir Peak from the Mint Valley trailhead on July 22. Despite a gloomy forecast, a soggy, over-grown trail and a chilly stream crossing, the group made good progress up the Lone-Tree gulch towards a finger of snow leading up to the col between the two summits. The only technical obstacle was a short step of wet rock that served as a funnel for 60 feet of loose rock and scree just below the col. This section provided us with some excitement as the movement of the rope often dislodged loose rocks from above. From the col, it was an easy scramble to the North summit where we enjoyed clearing skies and views of Moose Creek Valley and local peaks.

The north summit register consisted of a rusty can containing 3-sheets of deteriorating paper detailing the first ascent by an all-women MCA group led by Helga Bading and a few more recent ascents in the 1990s. We added a sheet of candy wrapper paper to the register with a short note and placed it in a zip-lock bag before returning the rusty can to the cairn. Then we descended to the col and climbed the south summit admiring the overhanging west faces of these "twin" summits.

After some debate we all decided that the north summit was indeed a few feet higher than the south summit, which is probably why a summit register was not located on the south summit when visited by Tom Choate, Kirk Towner and me the previous November (see Feb 2000 *Scree*). We enjoyed a quick snack and a few flakes of snow on the summit and then headed down, enjoying an excellent glissade from below the saddle to the south of the summit. A brief period of warm sunshine caught us on the descent warming spirits before the rains moved back in. After safely crossing back across the Little Susitna, we headed out the trail arriving back at the trailhead by 7 P.M. - an 11-hour round trip.

Future parties heading to Souvenir Peak will find registers on both summits and should

consider taking sufficient paper to copy the handwritten entries in the N. summit register before they become completely unreadable. A new canister for the N. summit register would be good as well.

The Leader's Corner

This is a new section for MCA trip leaders and persons interested in leading MCA trips. The Leader's Corner will be used to announce training events, provide tips on leading safe club outings, and keep leaders informed of changes to guidelines for MCA sanctioned trips. If you would like to see a specific topic or question addressed in future issues, contact Bill Romberg at wromberg@gci.net or 677-3993.

New policy on club-sanctioned trips effective Aug 1, 2000

In March 2000 the Board of Directors proposed several changes to the MCA policy on club-sanctioned trips to help insure that all MCA trips

are conducted in a safe manner by qualified leaders. The new policy became effective Aug 1, 2000. Some of the primary changes to the policy include adding the requirement that MCA trip leaders hold current certifications in basic first and CPR (or Basic Life Support-BLS) and that leaders attend an MCA Leader Orientation course once every five years as a refresher. The Board also added language to require **new** leaders of **technical** trips (Class E or higher) to have served as co-leader on a similar-level trip with a qualified MCA trip leader first. In addition, the Board revised and added the Trip Leader Responsibilities and Trip Leader Checklist documents to the policy to provide current and new leaders with a clear understanding of club rules and procedures for leading club trips. Two Leader Orientation courses were held this spring/summer (April & July) to explain the new changes and answer questions regarding leader qualifications, trip rules, and trip guidelines/procedures. The Trip Leader Course Packet which contains the revised policy, and other information useful to trip leaders is available on the MCA website under Membership Information or can be obtained at the monthly meeting. One additional Leader Orientation Course will be held October 18, 2000 at 6:30 p.m. (prior to the Oct. general meeting) for all those who were unaware of the requirement and/or were unable to attend the previous courses.

Motorola hand-held radios available to trip leaders

MCA recently added 4 Motorola FRS handheld radios to the list of equipment that can be checked out by qualified trip leaders for use on club-sanctioned trips. These small handheld radios have a range of up to 2 miles and were purchased for the purpose of maintaining communication within the group on club outings. The radios are powered by 3 AA batteries and can be checked out from Paul Templeton, co-chair of the Hiking and Climbing Committee, 688-2551 or kavikak@gci.net. In addition to the radios, the club has 1 EPIRB and 6 avalanche beacons (including 2 MTS Trackers) that can be checked out for club-sanctioned trips.

Four hikers were attacked by a swarm of bees on Sunday, June 25th, at the Negropolis Formation, about four miles from the park's west entrance station. Each was stung repeatedly, with one victim receiving over 100 stings and breaking his leg while fleeing the attack. The bees have since been positively identified as Africanized honey bees. The area adjacent to the attack was closed to the public for over a week. Rangers made several attempts to find the hive with the assistance of pest management personnel from San Bernadino County and one of the four victims, but all efforts to locate it have so far been unsuccessful. The area has reopened. Cautionary information is being distributed at visitor centers and entrance stations.

On June 25th, four climbers were injured by lightning while climbing the southeast buttress of Cathedral Peak. When the lightning struck, Andrew Betts, 24, Brad Betts, 28, and Gerard Meade, 28, were on the final pitch of their ascent, and Bojan Silic, 23, and Wolfgang Ertel, 42, had just reached the summit. Three of the climbers lost consciousness and four received minor burns. A ham radio operator relayed the first report to the park, stating that just one person had been injured. Because of the storm, it was not possible to fly in by helicopter, so a 12-person rescue team led by rangers Jeff Webb and Paul Austin hiked to the area. While they were en route, they learned that four climbers had been injured and that they were assisting each other on a technical descent on the northwest side of the peak. Four additional rescuers were dispatched to the scene. Paramedic Keith Lober and EMT Steve Yu heli-rappelled into the area once the storm cleared. The Betts brothers were evacuated by trail, then taken by ambulance to the Mammoth Lakes hospitals; the other two injured climbers declined treatment. All are expected to recover from their injuries.

MCA Trip Classifications

The classifications below do not take into account individual trip hazards such as river crossings, scree slopes, snow fields, bears, etc. Trip leaders are required to inform the trip participants of any such hazards either verbally, on the sign-up sheet, or in the trip description. Leader approval is required for participation on all trips.

NON-TECHNICAL: Following are a few standards used to classify non-technical trips. The classification is made in terms of hiking distance and altitude gain. Many trips are not on established trails.

CLASS A: Easy hikes with a maximum distance of 8 miles for day trips or 4 miles per day for overnight trips. Altitude gain up to 1200 feet.

CLASS B: Trips involving a maximum distance of up to 12 miles for a day trip or 6 miles per day for an overnight trip. Altitude gain of 1200 to 2500 feet.

CLASS C: Trips up to 15 miles for a day hike or 8 miles per day for an overnight trip. Altitude gain up to 3500 feet. Scree, steep grass or other rough terrain problems may be encountered.

CLASS D: Hikes and climbs with an altitude gain of over 3500 feet or a distance of greater than 15 miles for a day-hike or greater than 8 miles a day for an overnight trip. Peaks in this classification may require minimal climbing skills.

CLASS E: Hazardous climbing conditions or stream-crossing conditions may be encountered. A basic mountaineering course may be required.

TECHNICAL: Technical trips are open to all qualified climbers. However, the registration on any particular trip must be restricted to a safe and manageable number of climbers. Registration is made directly with the leader, who determines the qualifications needed for the trip.

GLACIER TRAVEL: Trips requiring roped travel over glaciers. Knowledge of crevasse rescue, and ice axe and crampon skills are required. Basic understanding of ice and snow anchors also required.

FIFTH CLASS: Trips which involve fifth class climbing. A Basic Mountaineering course or equivalent is required. Knowledge of belay and rappel techniques and placing anchors is required. Climbing difficulty varies widely with each trip.

TRIP PARTICIPANTS have the obligation to acquaint themselves with the nature of the trip and to verify that it is within their capability and experience. Anyone wishing to participate in any trip above CLASS A must have completed one or more trips of the next lower classification, or the equivalent.

Approved: MCA Board, February 15, 2000

Trip Leader Responsibilities

1. The leader must get approval of the proposed trip from the H&C Committee prior to advertising the trip.
2. Per MCA by-laws, club trips must be advertised in a club publication. In other words, the MCA membership must be informed of the trip. The H&C committee must approve the club trip about 35 days before the trip so that the H&C chair can forward the approved trip list to the editor of the Scree.
3. Important: If a H&CC approved trip cannot be planned a month in advance, the organizer may announce the trip as a personal trip at the next club meeting when the MCA president asks for announcements. Anyone may advertise a personal trip at the general membership meeting, which is an important service the club offers to all members - to help bring hikers and climbers together. The value of a club sanctioned trip is it offers the membership a trip leader that has been approved by the H&CC as a qualified leader.
4. The leader is responsible for providing and maintaining the trip sign-up sheets at monthly meetings. Coordinate with the H&CC Chair if unable to make the monthly meeting prior to the trip.
5. The leader should describe their proposed trip at club meetings.
6. The leader should contact members that have signed up for the trip to discuss the details of the trip, including proposed route, required gear, hazards, and meeting arrangements.
7. The leader must leave a trip roster containing a brief description of the proposed route and the names and telephone numbers of participants with a responsible person that will be able to contact a H&C Committee member (names and telephone numbers are on the sign-up sheet) in case of an emergency or delayed return.
8. The leader should brief trip members on the general rules for MCA sanctioned trips using the Trip Leader Checklist. If members already know each other and have been on previous trips, not much may need to be said. If new members are on the trip, use the checklist.
9. For safety and liability reasons, the leader must follow the general rules for MCA sanctioned trips as published in the MCA policies.
10. After the trip, the leader is encouraged to provide a trip report (over the phone or in writing) to the H&CC This is just "how did the trip go" and who participated. It also serves as a means to let the H&C Committee know the trip members returned safely.

Other documents trip leaders should consult:

1. MCA Club Sanctioned Trips policy, sections on: trip classifications, general rules, leader qualifications, and recommended gear).
2. Trip Leader Checklist
